Your first visit

We enjoy taking the time to get to know our patients personally. We believe this is also important in order to offer excellent care and clearly understand our patients' needs and expectations.

At your first appointment we will always carry out a thorough exam and we may take x-rays and photographs to allow us to assess you fully. You will receive the very best and most up to date advice on the options available and complete transparency on fees before any treatment is carried out.

Before you visit us you will be emailed access to questionnaires about your personal details, oral health and medical history. This will help us to discuss any specific needs you have and plan treatment that is appropriate to you. Whatever your treatments needs, we can help.
